

:pegon

## :pegon The Company

A Group-independent company, :pegon GmbH sells top quality materials for the plastics processing industry. Our focal area of business is in high-quality speciality plastics based on flexible polyolefins. A large product spectrum is divided into three main areas of applications:

- Standard Thermoplastics
- Advanced Thermoplastics
- Thermoplastic Compounds

Competence, experience and the specialist knowledge are the reasons behind :pegon GmbH's success as a first class point of reference on the national and international markets. As well as our range of materials, we also offer our customers a comprehensive range of services from consulting to transport logistics.

## :pegon Industrial Services

### Processing and cleansing of plastics

- Separation of granulates with light fractions via wind separator, e.g. removal of spun glass
- Sifting of plastics in various grain sizes via mechanical sieve, e.g. granulate, mixed chipping, agglomerate
- Homogenisation and mixing of plastic granulates via mixing silo

### Packaging / Repackaging / Labelling

- Repackaging of all conventional transport packaging into sackware, octabins, BigBags and sample boxes
- Neutralisation of original goods
- Packaging of private label goods
- Ensilage of all aforementioned packaging
- Shrinking, labelling and weather-suitable packaging

### Storage / Shipping

- Loading, unloading and storage of plastics in all conventional transport packaging
- Set-up of sample storage including express shipping to international customers
- Stocking and stock removal (turnover) of plastics in interior and exterior storage and silo storage

### Complete logistics solutions

- Complete solutions for storage spaces
- Complete solutions for sample shipping
- Outsourcing of storage services

### Qualitymanagement

Of course, we are certified according to international standards:

- Quality management DIN EN ISO 9001
- Environmental management  
DIN EN ISO 14001

## How to find us:

### Ask us!

Our service team will be happy to answer your questions.
